

Pro-Zyme

Laundry Detergent

DESCRIPTION

Pro-Zyme is a highly effective laundry detergent that digests grease, protein and starch soils by a variety of enzymes and gives significant cleaning results with lower wash temperatures. *Pro-Zyme* contains anionic and nonionic surfactants for removing most types of soils in settings such hospitals, nursing homes, assisted care facilities, hotels and restaurants.

Pro-Zyme's concentrated liquid formulation prolongs textile lifetime by reducing the fabric damage and lint build-up in dryers caused by harsher caustic chemicals. The many types of enzymes in *Pro-Zyme* assure brighter colours, textile whiteness and less pilling on white cotton, coloured cotton and polycotton fabrics. These features make *Pro-Zyme* the detergent of choice for better results at more economical concentrations.

BENEFITS

- Using *Pro-Zyme* reduces the number of products required from five (5) to three (3)
- Lowers linen rejection rate
- Minimizes colour fading
- Minimizes dye transfer

DIRECTIONS

Pro-Zyme is designed to be dispensed directly from the shipping container by your liquid laundry dispenser. Please contact your Maxim Representative for specific recommendations.

Tumbler Machines (Front Loading):

Light soil: use 60-90 mL (2-3 oz) per 45 kg of linen.

Heavy soil: use 120-180 mL (4-6 oz) per 45 kg of linen.

Agitator Machines (Top Loading):

Light soil: use 30-60 mL (1-2 oz) per 45 kg of linen.

Heavy soil: use 60-120 mL (2-4 oz) per 45 kg of linen.

PHYSICAL DATA

Appearance	Liquid
Color	Blue
Foam	Moderate
Odor	Pleasant
pH	8.5-9.5
