

Volatile Spotter

Dry Solvent

Description:

DRY SOLVENT is an exceptionally useful volatile dry spotter that evaporates quickly and completely, leaving no soil-attracting residue behind. It is one of the safest blends of solvents and is as volatile as anything currently available.

DRY SOLVENT is the perfect first step on unknown stains because it won't set the stain or cause any other problems like bleeding, distortion or browning. It saves time and money and is fantastic for the removal of tar, oil, gum, grease and a wide variety of oily stains. **DRY SOLVENT** can be used on both fabric and carpet stains.

Directions For Use:

Vacuum carpet thoroughly before beginning the cleaning process.

Do not mix, use full strength.

Apply a minimal amount of **DRY SOLVENT** to a clean white towel and apply to carpet or fabric. Do not apply directly to carpet or fabric.

Using a tamping brush, tamp the affected area to agitate. Blot with clean white towel from the outside-in to prevent spreading the spot or stain. For best results, use POG Spotter on stain before applying **DRY SOLVENT**.

pH: N/A

Caution:

Before application, pretest for colorfastness in an inconspicuous area. Dilution may vary depending on soil conditions. Do not walk barefoot on wet carpet.

Dispose of unused use solutions according to applicable local and federal regulations. Read MSDS before use.

- Removes tar, oil and gum
- Evaporates quickly and completely
- Mild odor

Your customers deserve the red carpet treatment. We think you deserve it too!
