

# KLING ON

Safety Acid Cleaner

## DESCRIPTION

**Kling On** is a multi-purpose, phosphoric acid-based cleaner to replace several products with one, yet cleans and brightens in a single operation.

**Kling On** cleans water deposits, rust and stains from toilet bowls, urinals, bathroom fixtures, ceramic tiles and grouting.

**Kling On** is especially designed to cling to both vertical and horizontal surfaces to provide longer contact time to clean and deodorize.

## SPECIAL INFORMATION

Avoid contacting **Kling On** with eyes and skin. Store upright at temperatures above freezing and do not mix with bleach or any other cleaners.

## DIRECTIONS

### **For Toilets:**

Lower bowl level in toilet bowl, approximately 60 mL to 90 mL (2 to 3 oz.) to wet surface of toilet and bowl mop. Swab and clean surfaces, particularly under the flush ring. Flush toilet and rinse bowl mop.

### **For Urinal:**

Hold mop over urinal and saturate. Swab urinal surfaces thoroughly, including under flush ring and around drain outlet. Replace screen and flush urinal.
