

Max Sour

Laundry Sour

DESCRIPTION

Max Sour is a fluorescent blue laundry sour for use by commercial and institutional laundries where a distinctive blue tint is desired. This quick-dissolving powder is economical and very convenient to use as a residual alkalinity neutralizer for laundry applications.

Max Sour is a one-step product for brightening, neutralizing and blueing your laundry fabrics. **Max Sour** also has the additional perk of containing special ingredients that help prevent fabric discoloration due to rust in the wash water.

DIRECTIONS

For best working results:

Flat work - neutralize to pH 6.0-6.5

White apparel - neutralize to pH 5.0-5.5

Colored work - neutralize to pH 4.5-5.0

Usage amounts of **Max Sour** will vary. For specific applications, please check with your Maxim representative.
