

DESCRIPTION

Max Pro Rinse is a liquid rinse additive which is metered into the final rinse of the dishwashing machine in very minute quantities through the Project Clean rinse injector. **Max Pro Rinse** contains wetting agents to greatly reduce the surface tension of the rinse water. This allows water to drain completely and quickly, producing spot-free, sparkling dishes and cutlery. **Max Pro Rinse** is formulated for soft water areas and for both low temp and high temp machines. For low temp dish machines, a dish sanitizer solution should be used to finish your washing cycle to ensure the dishes are clean and safe to use.

FEATURES & BENEFITS

for use in automatic dishwashers • leaves dishes and cutlery spotless and streak-free • concentrated for low use dilutions • for soft water use

DIRECTIONS

Very minute quantities of **Max Pro Rinse** are injected directly into the final rinse through the rinse injector. For low temperature warewash machines, items should be rinsed with a sanitizing rinse solution. To meet local health regulations, the final rinse water temperature should be 80 - 90° C. (180 - 195° F) if a sanitizing rinse solution is not used.

FIRST AID

Eyes & Skin: If eye or skin contact occurs, immediately flush with plenty of water for at least 15 minutes. Call a physician. **Inhalation:** Remove to fresh air. Call a physician. **Ingestion:** If swallowed, promptly give plenty of water or milk. Do not induce vomiting. Call a physician.

For further information, please review the **Safety Data Sheet (SDS)** and **Product Label**.

STORAGE & HANDLING

Keep from freezing. Store upright in original closed container at room temperature away from children. Do not mix with any other chemicals.

PHYSICAL DATA

Package: 4 x 3.78L cases, 18.9L pails
& 2 x 10L cases

Appearance: clear liquid

Colour: blue

Foam: low

Odour: mild

pH: 8-9
